PROJECT in BE

Project Name: A computational Dynamic Dependency Model Depiction for Client Authorization.

Details:

- Front End: JAVA (Eclipse)
- Back End: Oracle, MySQL
- OS: Windows 7
- Team size: 4
- My Role: Developer

Description: Development of authorization mechanisms for secure information access by a large community of users in an open environment is an important problem in the ever-growing internet world. This project proposed a computational dynamic trust model for user authorization rooted in findings from social science.

PROJECT in Diploma

Project Name: Cooking Gas Distribution Agency Management System.

Details:

- Front End: Visual Basic (VB) 6.0
- Back End: Oracle, MySQL
- OS: Windows XP
- Team size: 7
- My Role: Developer

Description: The project is developed to make the manual process of distribution agency easy by converting the process into a computerized system for billing and maintaining the stocks. Customer details are stored in the database and orders are processed against the Customer and billed accordingly. Reports can be generated for the Stock Inventory and history of orders for a Customer.
